## WET CURING BLANKET

WCB SERIES

### WET CURE BLANKET WITH SYNTHETIC FABRIC

- Wet cure method for concrete curing
- Highly absorbent, synthetic fabric coated with laminated white poly film
- 8' x 250' roll
- Meets ASTM C-171 specification for concrete curing
- Ultra-absorbent fabric holds up to 800% times its weight in water.
- White poly reflects sunlight & heat rays

## APPLICATIONS & BENEFITS

- Provides a smoother, harder concrete finish to concrete surfaces
- Quality lamination between the two fabrics
- Material is flexible & easy to handle
- Helps keep freshly poured concrete from cracking
- Wet curing blankets are perfect for slab on grade, pervious, decorative concrete, and some roadway applications.
